

Laveena Kachi

Full Stack Web Developer

Experience: 3.4 Years

Email: laveenakachi123@gmail.com

Contact No: 8554040211

Location: Pune, Maharashtra.

LinkedIn: <https://www.linkedin.com/in/laveena-kachi-373047252>

❖ Professional Summary -

Versatile and results-oriented Full-Stack Web Developer with over **3.4 years of experience**, specializing in **PHP, Laravel**, and **Pimcore** for building scalable, high-performance web applications. Adept at working within Agile frameworks and contributing across the full software development lifecycle — from backend development and database design to deployment and optimization.

Also experienced in full-stack development using **React.js, Node.js, Laravel**, and **MongoDB**, with the ability to independently deliver complete web solutions. Skilled in integrating modern frontend technologies with robust backend systems, ensuring seamless performance and user experience.

Passionate about writing clean, maintainable code and staying current with emerging technologies to deliver impactful digital solutions.

❖ Professional Experience –

1. **Freelance Full-Stack Web Developer**

Business Partner Group – [Brisbane]

04/03/2025 – Present

- ☐ Designed and developed responsive web applications by integrating modern frontend technologies (React.js) with robust backend systems (Node.js and Laravel).
- ☐ Built and managed RESTful APIs for seamless communication between frontend and backend.
- ☐ Implemented user authentication, role-based access control, and secure data handling practices.
- ☐ Utilized MongoDB for efficient document-based data storage, enabling high performance for dynamic applications.
- ☐ Independently managed the full development lifecycle — from requirement gathering and UI/UX implementation to testing and deployment.

□ Ensured cross-browser compatibility and mobile responsiveness across all platforms.

2. **Laravel Developer**

InnoWeb Solutions – [Toronto, ON]

20/10/2024-28/02/2025

Worked on **frontend** and **backend** using the **Laravel framework**, **HTML/CSS**, & **JavaScript**. Gained experience with **Nova technology** while designing, implementing, and integrating websites based on client requirements. Focused on building dynamic and user- friendly web applications tailored to business needs.

3. **Pimcore Developer**

Credencys Solutions Inc – [Ahemdabad, Gujarat]

27/02/2023 – 30/09/2024

Experienced **Pimcore developer** with hands-on expertise in creating web applications and e-commerce websites. Proficient in **PHP, including the Laravel framework**, and skilled in leveraging Pimcore technology to develop robust **CMS** and **Digital Asset Management (DAM)** solutions. Demonstrated ability to build scalable and efficient web solutions tailored to client needs.

4. **PHP/Laravel Developer**

Cemtrelabs Solutions Inc — [Pune, Maharashtra]

01/02/2022 – 30/12/2022

Hands-on-working experience in **PHP(Laravel Framework)**, **jQuery**, **HTML5**, **CSS**, **Bootstrap**. Working for Developing e-commerce websites & web applications, Unit testing & maintaining the modules.

❖ Notable Contributions -

1. Lions Group Public Websites

- ☐ Independently led full-stack development using **React.js**, **Node.js**, and **MongoDB**, deploying on **Linux servers via SPanel**.
- ☐ Built responsive, feature-rich public websites with key integrations including:
 - **Google Maps, Google Analytics, Language Switcher, Facebook Login, Google ReCAPTCHA**
 - **PDF/Excel/CSV Export, Drag-and-Drop Menus, YouTube Embeds**
 - **SEO and Business Gmail Notification Templates**
- ☐ Optimized frontend performance using **Tailwind CSS, Bootstrap 5**, and **CSS/JS minimization**.
- ☐ Collaborated on **MongoDB schema design** and **REST API development** in coordination with the Admins team.

2. Lions Group Admin Panel

- ☐ Developed the Admin Dashboard using **Laravel** and **React.js**, ensuring seamless backend and frontend integration with shared features from public websites.
- ☐ Implemented secure data handling, user management, backup systems, and robust API communication.
- ☐ Shared major development tasks with the Public Website team, including:
 - **MongoDB Development**
 - **REST API Design & Integration**
- ☐ Ensured consistent UI/UX and code reusability across both platforms (≈90% shared features).

3. Malabar Gold:

This project is basically a Data Management System for enrichment products data where the product gets approved by the L2 user. This project is based on PHP programming language and pimcore framework which needs some knowledge of Symfony framework. In addition to that It has a pimcore backend(backend). and HTML, CSS, JavaScript, AJAX

My main responsibility was to handle planogram wireframes for L1 & L2 users on home page as well as product page, which includes **search/filter** functionality to filter channels & product attributes, **clear filter** functionality to clear all the filters that are applied by the user, **bulk upload** functionality to upload the csv file by updating the effective_date for norms & seasonal norms, **download** functionality to download the planogram data in

csv file, **default layout** functionality to display the layout for particular users, **sort** functionality to sort planogram data in ascending or descending order for norm_deficit, norm_excess, norm_deficit_percentage, norm_excess_percentage.

4. **Pick Dish Appliaction:**

The main goal of this project was to create a website where the users can order various types of dishes, appetizers, beverages, desserts, Italian food also the user has a take-away option to takeaway his order. My main responsibility was to create filters for dishes, appetizers, beverages, desserts. user can filter the dishes based on the restaurants, locations & current locations. This project is based on Laravel framework, HTML & CSS. I have also worked on CRUD API's to perform create, read , update & delete operations for admin, admin can also have permission to approve, reject & do pending for dishes, I have worked on home page to display all dishes with filters, privacy & policy page to display the privacy details and Terms and conditions page.

5. **Radian Weapons:**

In this project, I focused on frontend development using JavaScript and jQuery while integrating the backend with the Laravel framework. My role involved creating an interactive and user-friendly interface to enhance the overall user experience. Additionally, I worked on integrating 3D models into the platform, allowing users to interact with and visualize products dynamically.

6. **Huber Li – Rolex Redesign Website:**

For this project, I was responsible for designing the frontend using Pimcore Areabricks. My role involved creating visually appealing and responsive layouts, ensuring a seamless user experience. I worked on structuring the content, optimizing the UI/UX, and implementing various design elements to align with the brand's aesthetics and functionality requirements.

❖ **Technical Skills** -

1. Languages & Frameworks:

- Core PHP, Laravel, Symfony, Pimcore, NodeJs.

2. Databases & Tools:

- MySQL, MongoDB.

3. Web Technologies:

- HTML/CSS, ReactJs, JavaScript, jQuery, AJAX, Nova

❖ **Education** –

2019-2021	B.Sc(CS)	Nowrosjee wadia college	68.89%
2023-2025	M.Sc(CS)	Vishwakarma Institue of Technology	8.00 CGPA
